

Policy: 3.1	<h2 style="margin: 0;">Service Access, Demand and Capacity Management</h2>
-------------	--

Policy Statement:

ODEEP effectively manages demand for services, including high demand periods to reduce stress on staff and resources, while ensuring the provision of high quality services. It is the intention of ODEEP that all infants, pre-schoolers and primary school aged children and their families who have a disability and/or developmental delay who wish to receive early childhood intervention and therapeutic supports from ODEEP will be able to do so in a reasonable timeframe and without discrimination.

This policy outlines procedures to predict, prepare for, and effectively manage client numbers to ensure that clients access quality services as quickly as possible, and that those most in need are prioritised. ODEEP will also identify and address barriers to access for children and families. ODEEP will use service planning to maximise accessibility for families, ensuring that all services, activities, facilities and premises are designed to maximise physical and cultural accessibility for service users.

Service access and the demand management system will be regularly reviewed within a continuous improvement framework and actions taken to improve the system will be monitored and evaluated.

Responsibilities and delegations

This policy applies to	ODEEP management staff and all families seeking enrolment who meet entry criteria at ODEEP as well as referring organisations.
Specific responsibilities	This policy is developed, reviewed and communicated to staff by the ODEEP CEO. It is available to the community and implemented by the ODEEP CEO and ODEEP Practice Manager.
Policy approval	ODEEP CEO

Definitions

Demand: the number of potential clients in need of services from the organisation.

Capacity: the number of clients the organisation can service at any given time.

Procedures

Criteria for Entry

Referral to ODEEP can be made by a parent, other third parties or professionals such as GP, Paediatrician, Early Childhood Teacher or allied health staff. If the referring party is a third-party or an external service provider the family must have given prior approval for the referral to take place.

Upon request of service provision from ODEEP, either by phone or in person, the referring party will be required to provide information regarding the child and family. This information will be documented on the ODEEP Referral Form. A family and child seeking services from ODEEP must:

- Be an infant, pre-schooler or primary school aged child (0-12 years).
- Have a diagnosed or suspected disability and/or a developmental delay in 2 or more areas of development.
- Have a funded NDIS plan, medicare enhanced primary health care plan (requires a gap payment) or is willing to fully fund the service provision out of pocket.

Priority system

Priority of access to ODEEP is determined by the following:

- Children with the most severe disabilities/developmental delays.
- Young children.
- Families who have more than one child with a disability.
- Families where one or more parent has an intellectual disability.
- Families from ATSI and CALD background.

When a referral is made and the child is deemed not to be eligible for ODEEP services all attempts will be made to provide referral pathways to the most appropriate community service such as community health centres etc. Where a referral is made and ODEEP is not able to meet the current needs of the child, ODEEP will make all attempts to provide referral pathways to other community services. This may be due to a long waiting list or lack of service provision in an area of support identified by the family. Referral will also be made to relevant NDIS partners/planners for appropriate referral pathway information.

Where a referral is made and the child's needs may be met through an NDIS pathway, and the family is not accessing this pathway, a referral will be made to the Early Childhood Early Intervention (ECEI) Pathway provider to assist the family through this approach.

Once a referral is taken the information is transferred to the ODEEP Waiting List/Priority of Access document. This waiting list is managed by the ODEEP Practice Manager in consultation with the ODEEP CEO. Access is not influenced by any other factor (eg. Gender, race or socio-economic background).

All referral and waiting list decisions are conducted in compliance with the relevant anti-discrimination legislation as well as priority of access as outlined above.

Waiting list procedures

Where demand exceeds capacity, the ODEEP Practice Manager is responsible for keeping an accurate record of waiting lists.

This includes recording:

- Date commenced on waiting list.
- All relevant information about a potential client, including their eligibility and areas of priority.
- Types of services requested.
- Date that the client exited the waiting list, and reason for exiting.

Clients will be advised that they are on the waiting list, their position on the list and an estimate of the approximate waiting time before services can be provided. If lengthy delays are expected, the client is informed and advised of alternative options including referrals to another service provider.

Developing a demand management strategy

The demand management strategy forms part of ODEEP's quality management system. ODEEP is dedicated to continual monitoring, review, and evaluation of demand management strategies to inform continuous improvement activities.

Principles of demand management

The ODEEP Manager is responsible for the establishment and monitoring of a demand management strategy which aims to align capacity and demand. The demand management strategy:

- Is client-focused and treats each case individually.
- Prioritises at-risk clients.
- Predicts high-demand periods before they happen.
- Will decrease excess demand and increase capacity where possible; and
- Is regularly reviewed and informed by data.

Data collection, review and identification of appropriate strategies

The organisation will review the data on the waiting list/priority of access document to inform demand and capacity management systems. The data which is used may include:

- Number of clients who have been waitlisted.
- The types of services clients are requesting.
- Average time on the waitlist before receiving service.

The ODEEP CEO is responsible for reviewing data and staff feedback on previous high demand periods in order to map trends and, where possible, recommend strategies to assist in meeting demand. The ODEEP CEO will review with data and report to the ODEEP Board on a regular basis as

well as utilise this data for strategic planning purposes.

To predict demand the organisation needs to determine:

- The client demographic to which it provides services.
- Capacity of services.
- The types of services requested; and
- External factors contributing to demand such as political, economic, social forces and demographic changes in the area where the service operates and other external environmental changes.

Strategies to increase capacity include:

- Identifying and managing factors impacting client flow through.
- Streamlining administrative and client intake processes to ensure that they are efficient, reduce duplication of work, and time spent on paperwork. This may be done through improvements to software and IT systems, and through information sharing agreements with other service providers.
- Managing planned staff leave to ensure that there are sufficient staff during predicted high demand periods.
- Training staff to develop adaptive abilities and manage resources in high demand periods; and
- Measures such as recruiting additional staff, flexible hours for delivery of services etc.

Business Interruptions

ODEEP will put into place effective business arrangements to ensure timely and appropriate support to minimise the risk of business and service delivery interruptions. These arrangements and strategies may include:

- Efficient and effective day to date operational management to ensure continuity of supports.
- Supports are planned with each participant to meet their specific needs and preferences and these arrangements are flexible to meet the day to day individual needs of the child and family.
- Managing planned staff leave to ensure that there are sufficient staff to provide ongoing services.
- Implementing effective and timely staff recruitment processes.
- Rescheduling cancelled appointments as soon as it is possible.
- Providing administrative staff to assist service provision staff to make appointments with families.

Service Agreements:

Upon initial service delivery for families accessing ODEEP services, the ODEEP Practice Manager or other staff members as delegated by the Practice Manager, will meet with the family to discuss service provision options. Information appropriate to the persons needs will be given, which can be provided in a number of formats depending on the individual needs of each family. During this meeting a quote for services will be given to the family, outlining the types of services that they have requested and the costs of the service (e.g. as per the NDIS price guide), the cost of travel for these services, the number of hours and relevant staffing allocations.

If the family is in agreeance with this quote for services a service agreement will be developed. This agreement is in accordance with NDIS legislation and outlines information such as:

- Family/child details.
- NDIS reference number.
- Agreement start and end dates.

- Total annual funding.
- ODEEP responsibilities.
- Parent/Carer responsibilities.
- Payments and claiming.
- Changes to and/or end of service agreement.
- Travel.
- Cancellations.
- Feedback and Complaints.
- GST.
- Insurance and workers compensation and business insurance.
- Working with children checks, NDIS worker screening checks and child protection legislation.
- Approval signatures.

Once the quote and the service agreement have been signed by both parties a copy will be kept and filed by ODEEP and a copy will be provided to the family. Service provision allocation will be documented and staff informed to begin service provision. A service booking will be made in the Dept of Human Services “Proda” system will be made if NDIS managed or a copy of the service agreement is sent to the plan manager by either ODEEP or the family.

Participant Money and Property

ODEEP does not have access to a participant’s money or property, nor does any ODEEP staff provide financial advice or information other than that which would reasonably be required under the participant’s plan.
